

Producer

ESTRELLA ES-PRESS, s.r.o.
Nitranská 415/1, 460 01 Liberec 3
Branch: Těpeře 34, 468 22 Železný Brod, Czech Republic

Product

- a) JEWELLERY-WAXED BEADS (Monther-of-pearl-beads)
- b) ONE-COMPONENT RESIN - ENT (Estrella Nano Technology)

JKPOV

647 1

Company ID Nr.

47284609

V.A.T. Nr.

CZ47284609

To point a)

Health safety - determination of lead in wax (varnish pigment) layer of jewellery products with surface treatment by waxing method. We are confirming that all the goods produced in our factory meets our client's requirements, containing no nickel and lead (antialergie products).
This certificate applies for dipping of all our beads and decors (including the dipped fire polished beads).

To point b)

The ENT technology insures a highly efficient organic paint with excellent chemical and mechanical resistance. The thickness of the paint layer is less than 15 micrometers and after the thermal hardening in 200°C the abrasive hardness reaches 2-3H.
The lacquer has an excellent adhesion to the raw glass, resistance against the abrasion and scratching, is stable in richness of colour owing to the heat and UV rays. It is water-resistant, resistant against vapour, alcohols (spirits), the G1 class liquids and cosmetic substances (perfumes).
Does not contain any heavy metals (Cd, Pb, CrVI, Hg).

Date: January 4rd, 2010
